### **Device Recommendations – 2024**

As a school we don't believe that mandating a particular device is necessary, and because individual student needs differ, this can be a complex question to answer. We do, however, suggest you consider carefully the following minimum specifications for a suitable digital device at Pukekohe High School:

- Wireless networking capability using 802.11g or n
- 5 hours of use from one battery charge
- Large screen (10 inches minimum) enough to work with documents in order to create and edit content
- The ability to run a web browser (e.g. Chrome, Firefox, Internet Explorer) that will allow it to access Internet and other learning resources
- The school will provide an account for Office 365 for all students. This can be installed on up to five devices and will give access to all MS Office 365 in a web browser or on their device.
- Touch screen and stylus capability (desirable but not necessary)
- Is lightweight, but robust enough to handle daily use
- **Is in a protective carrying case**
- Given the above guidelines we suggest you seriously consider using a **full function Windows laptop.**

#### **Minimum Technical Specifications for Windows Laptops:**

- **CPU: Recommended** - Pentium N6000, N200, Core i3 or equivalent.  
**Not Recommended** - Celeron CPU (it is unresponsive and will test the patience of the student)
- **RAM (Memory):** at least 8 GB
- **Storage:** At least 128 GB

The above specifications are to ensure the student can do the work without being tested for extended wait times after each click.

Check with your retailer that your device meets these specifications before purchasing.

#### **Important Note:**

Although not ideal, chromebooks are compatible with our network.
